New SELLEYS PLASTI-BOND HEAVY DUTY BOG™ replaces Selley's Plasti-bond Heavy Duty

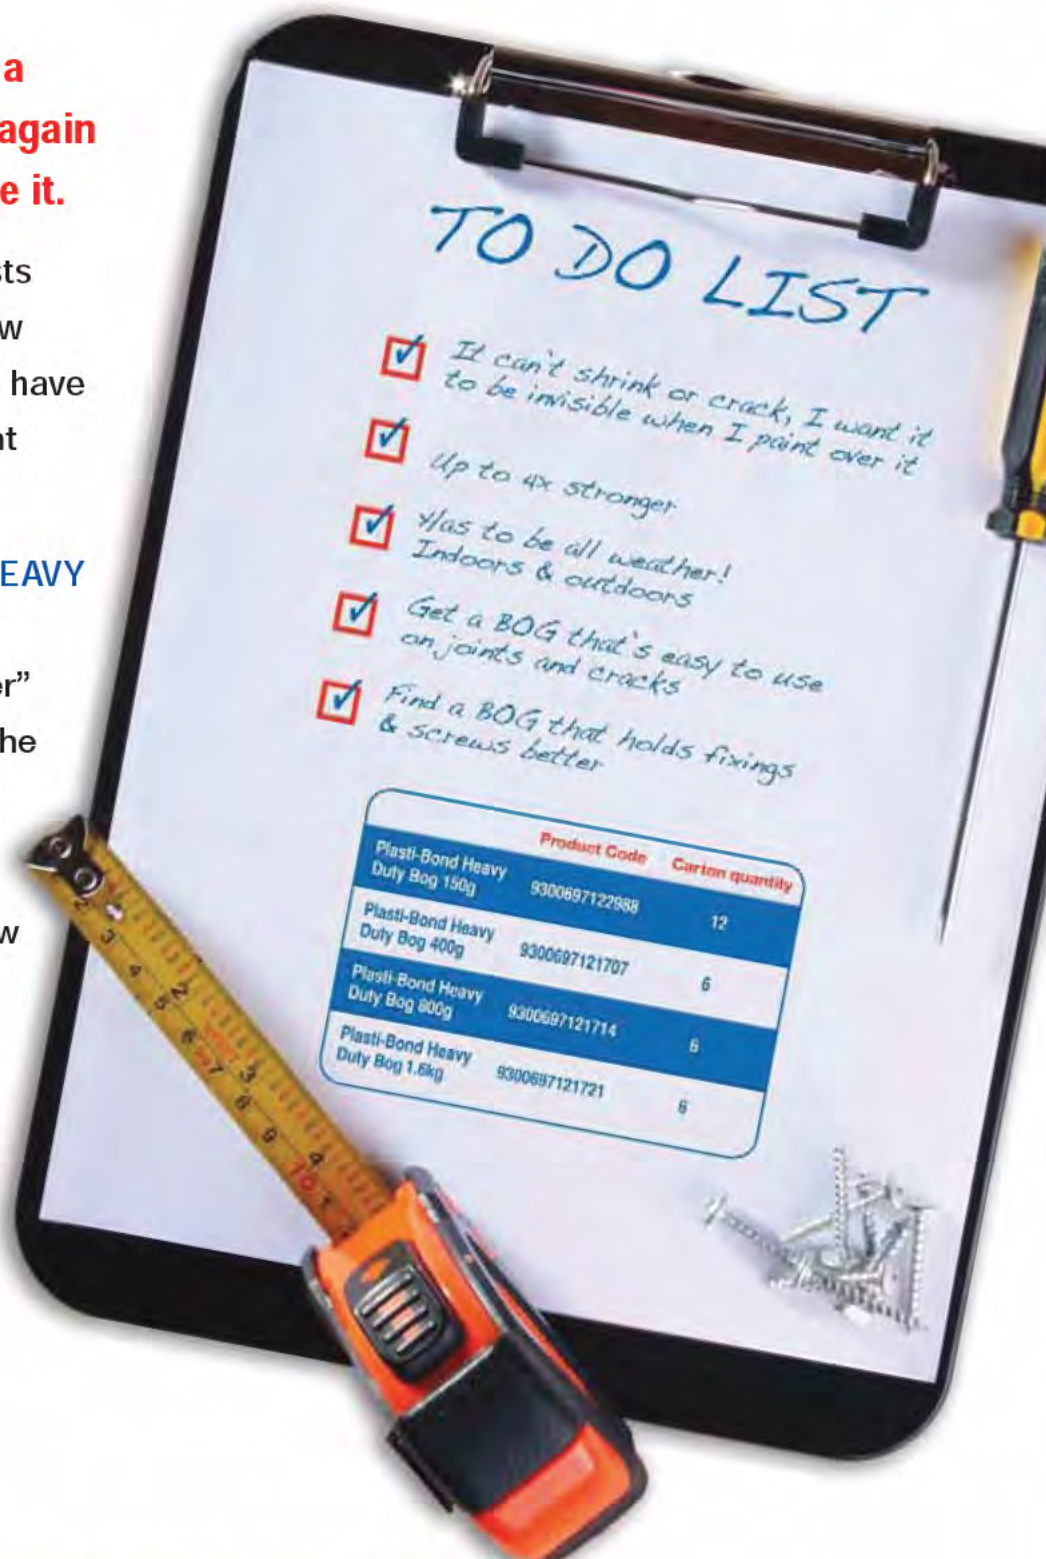

PLASTI-BOND HEAVY DUTY BOG is up to 4 x STRONGER for fixture holding strength

We always knew it was a better formula, but then again it's always good to prove it.

And that's what we did, tests were set up to measure how much "hold" screws would have when fixed into the different BOGS out there.

SELLEYS PLASTI-BOND HEAVY DUTY BOG won by having better "fixing holding power" of approximately 4:1 over the market leading competitor.

So, if you want stronger for longer hold and no show after painting, reach for SELLEYS PLASTI-BOND HEAVY DUTY BOG .

- TO DO LIST
- It can't shrink or crack, I want it to be invisible when I paint over it
 - Up to 4x stronger
 - Has to be all weather! Indoors & outdoors
 - Get a BOG that's easy to use on joints and cracks
 - Find a BOG that holds fixings & screws better
